Fee Pressure

Future of Super

ASCA 2021 Focus

- Lead the discussion on concepts of asset safety, control and post trade servicing
- Develop standards for the Australian market requirements within global trends
- Assess servicing impacts of changing insourcing/outourcing mix

- Expanding need for regulatory data, with a focus on efficiency and harmonisation
- Align data schemas and collection processes to minimise costs to end investors

- ASX CHES Replacement
- Lessons learned from pandemic disruption
- Known efficiency and risk issues in the service chain
- Out of date (or missing) standards – and why they are needed

Food for thought

How to plan for your business in terms of people, process, technology to adapt to opportunities of new ways of working?

What role can you play in helping to streamline and standardise the increasing regulatory reporting requirements across the value chain?

As an industry we are only as strong as our collective participants

We encourage an open dialogue and rely on volunteers within our member organisations to drive development.

I encourage you to get involved, and thank all those who contributed to ACSA in the last year
